

Nursery, KidsPraise! & Youth "Well Child Policy"

To minimize the chance of spreading illness, children who show signs of sickness will not be admitted into the *Nursery*, *KidsPraise!* or Youth rooms. We require that minors be fever-free for 24 hours before entering these ministry areas. This is for the health and protection of all children, youth and volunteers. You are encouraged to bring your child back to us **as soon as** he or she is well! (If an illness is discovered once a child is in the classroom, your child will be brought to you by a member of our Team. This step includes taking their temperature. Fevers of 100.3 or higher will constitute "illness," and our team will proceed with contacting parents.)

Upon recommendation of *The American Academy of Pediatrics,* a child should not be taken from the home/brought out with any of the following conditions:

- Fever
- Vomiting
- Diarrhea (even if associated with teething or medication)
- Flu diagnosed within previous 5 days
- Lice (if live bugs are present and/or not treated within the last week)
- Any symptoms of childhood diseases, such as: Scarlet Fever, German measles, mumps, chicken pox, strep throat, flu, or any other contagious or infectious disease
- Presenting with common cold symptoms
- Sore throat
- Croup
- Junky or barky cough, phlegm-filled or productive cough
- Any contagious or unexplained rashes
- Pink eye or other eye infections
- · Cloudy or green runny noses or persistent cough
- · Any communicable disease
- Any traveling to countries or destinations of medical concern/travel warnings

If we can assist in any way, please feel free to just say the word: prayer ministry, meal ministry, etc.

We appreciate your help in keeping all kids and Team members safe!

Effective: 03.01.2020
